

Response Format

“Always return JSON with an Object on the outside.”

OWASP about JSON response

Always have the outside primitive be an object for JSON strings:

Exploitable:

```
[{"object": "inside an array"}]
```

Not exploitable:

```
{"object": "not inside an array"}
```

Also not exploitable:

```
{"result": [{"object": "inside an array"}]}
```

SuccessResponse

```
{  
  success: true,  
  statusCode: 200,  
  message?: "Based on Stripe response",  
  payload?: {  
    paid: true,  
    source: {...}  
  }  
}
```

ErrorResponse

```
{  
  success: false,  
  statusCode: 400,  
  code: "article/article-not-found",  
  message: "Article not found",  
}
```

Response

```
{  
  success: true|false,  
  statusCode: 0,  
  message: null  
}
```

Success response

```
export function handleSuccessResponse(req, res, response) {  
  res.status(response.statusCode).send(response);  
}
```

Error response

```
export function handleErrorResponse(req, res, error) {  
  res.status(error.statusCode).send(error);  
}
```
